984	1200	\$ 99.00

The Fencing Factory is facing out the 10mm glass and will only stock 12mm glass in the future. We still have some 10mm to suit semi-frameless style pool fencing and the prices are listed above. Please check stock levels before ordering.

Our frameless glass fencing consists of 12mm thick panels with 8mm thick gates. These panels are installed using mirror finish stainless steel spigots. The Semi-Frameless glass fencing consists of 10mm thick panels with 8mm thick gates. These panels are installed between powdercoated aluminium square posts. These posts can be powdercoated to any colour of your choice from the Dulux powder coating colour range.

Glass pool fencing can add an elegant and stylish look to your pool area. Here at The Fencing Factory we specialise in toughened certified glass pool fencing. All our glass has been tested and complies to the most current standards. We can provide you with both semi-frameless and frameless style glass pool fencing.
